

The patriotic promotion for Deborah and Benjamin's

Wedding Party

M.S Polygon Multi-Chain Network

Worldwide

Powered by the  Crypto Community

because it's our story to share & add companions to invest with

Abstract: A peer-to-peer promotion using blockchain technology with no pre-likes and no initial outside recruitment. real stories Adjacent to primary sources identification with historical and contemporary influential figures. Establishing an independent, cooperative, and influential community. The right of every partner in action. new place, new start, new opportunities. Without a monarchical or any whales to control it, there will be a structure where there are title holders and main positions, and every partner in the action can reach the title of a holder/main position. The wedding party is the one that sets the stage for the initial patriotic recruitment. the number 18 and the first 18 patriotic cards are the main engines we need for our new voyage.

1. Introduction

Once I decided to make me and Deborah something special for the upcoming wedding, things evolved. My name is Benjamin, and I am the owner of @real18hiing.

I chose this pseudonym because of my private connection and sincere admiration for the 18th-century figure. In the world of cryptocurrency and finance, many people adopt this name as their pseudonym. However, not everyone is knowledgeable of the nature of this character: his actions, successes, generosity, and most importantly, his evolution over time in terms of his attitude and worldview. He struggled to overcome his early negative opinions and moved towards a more enlightened position.

As someone with a considerable understanding of peer-to-peer networks, blockchain technology, cryptocurrencies, and NFTs, I believe bringing all participants together in the face of frequent attacks is imperative. Only through collaboration and mutual support, we can ensure the safety and security of everyone involved.

More details about my occupation, hobbies, professionalization, and learning will come over time on my various channels. The same will happen for my and Deborah's (Deborah and me) real stories, which will be recorded and documented through NFTs mining and the creation of which will be published through graphics, illustration, and artificial intelligence utilities and tools.

I know I'm not a famous talented artist, but I have some Eli5++ knowledge.

The combination of our skills can bring this project to life.

I am honored to be the first representative ambassador for that matter.

2. Familiarity with the recruitment structure

first connection:

First, somebody needs to see the stated intentions in this white paper. Understand, believe in, and promote the idea, whether it is by starting to trade the Patriot card or by giving likes and positive comments on various channels. The most considered approach is to do there both.

the patriotic cards:

mint blockchain place: the Polygon network

minting the first page of this white paper inside 18 different NFT traits that will start the recurring, Each card becomes unique and special when colors are added to represent its character and role.

all will be published around the date of 06.04.2024.

first 3/18 NFTs will be listed for sale at a beginning price of 0.18 Matic at opensea.io marketplace

all eighteen cards' first listening will be at the price of 0.18 Matic.

from now on, the p. promoters will bring their loyalty to the arena.

3. Future positions and titles:

All future benefits will come with one or more benefits for each one who participates in the patriotic cause.

Citizen:

For every person who contributes to the promotion, first recognized by his wallet address and later by the patriotic name and number to be collected and given from each participant, the maximum number of our first Citizens is 11,664 (different traders).

PTM - Potential Team Member:

in this new society and economy, we need our elected representatives to grow our society; the chosen one is expected to arrive at the House of Representatives with many good deeds, seriousness, responsibility, and leadership behind him.

To become a PTM, the p. promoter needs to make the *split point come true.

Hardworking Striker:

Hardworking strikers will get the same benefits of a PTM and a new untold thing.

*a split point will be explained on the next page

4. the calculations with the number 18 in front

concepts/meanings explanation:

The 18th wheel: The successful formula when the number 18 gains its dominance if it's by the 18th wheel or, in other cases, applied in a way that will be reflected later.

split point: After every increase of 18 Matic by value of a card, we will have a split point like a halving with proof of work.

digit sum: is the mathematic situation Digit sum or Final Digit sum, for example, a digit sum for the number $58741 = 5+8+7+4+1 = 25$

Smart recruitment occurs at a split point when the existing holder of a P. Promoter card performs a free transfer of the P. Promoter NFT card to a new and unfamiliar wallet address with the current trading log. The new recruit must be informed and willing to fully commit to the goal.

Idle time is a case where there is a delay in trading one or more NFTs for a certain time.

5. trading rules:

- no more than 2 cards for a holder – this for trading and playing in this new kind of pre-metaverse with honesty and respect for each other.
- minimum 18 trades (one wallet to another wallet) before reaching a split point for realization
- when the last holder bought a p. promoter card \geq split point, need to perform a smart recruitment
- idle time between a new split to complete until the next trade shouldn't pass more than 18 days
- for our new piece of land, we need to achieve 18 split points. the last split point will be with a price tag of 306 Matic for each individual p. promoter card. the same thing for minimum overall trades that need to be $\geq 5,832$ with a minimal digit sum of \geq **18**

6. Risk Management:

Unfortunately, and as we already know, there are types who are not exactly fans of a legal association that is good for its environment. It is likely and must be considered cases in which "merchants" will be interested in stopping the patriotic activity by keeping a card in their wallet or transferring one or more cards wishing to stop the activity. when there will be inactivity on a card (stop from trading), and this will be for a period of over 18 days, a new patriotic card with the last price tag will be publish instead.

the new p. promoter card will get a new digit with +1 from left, for example:

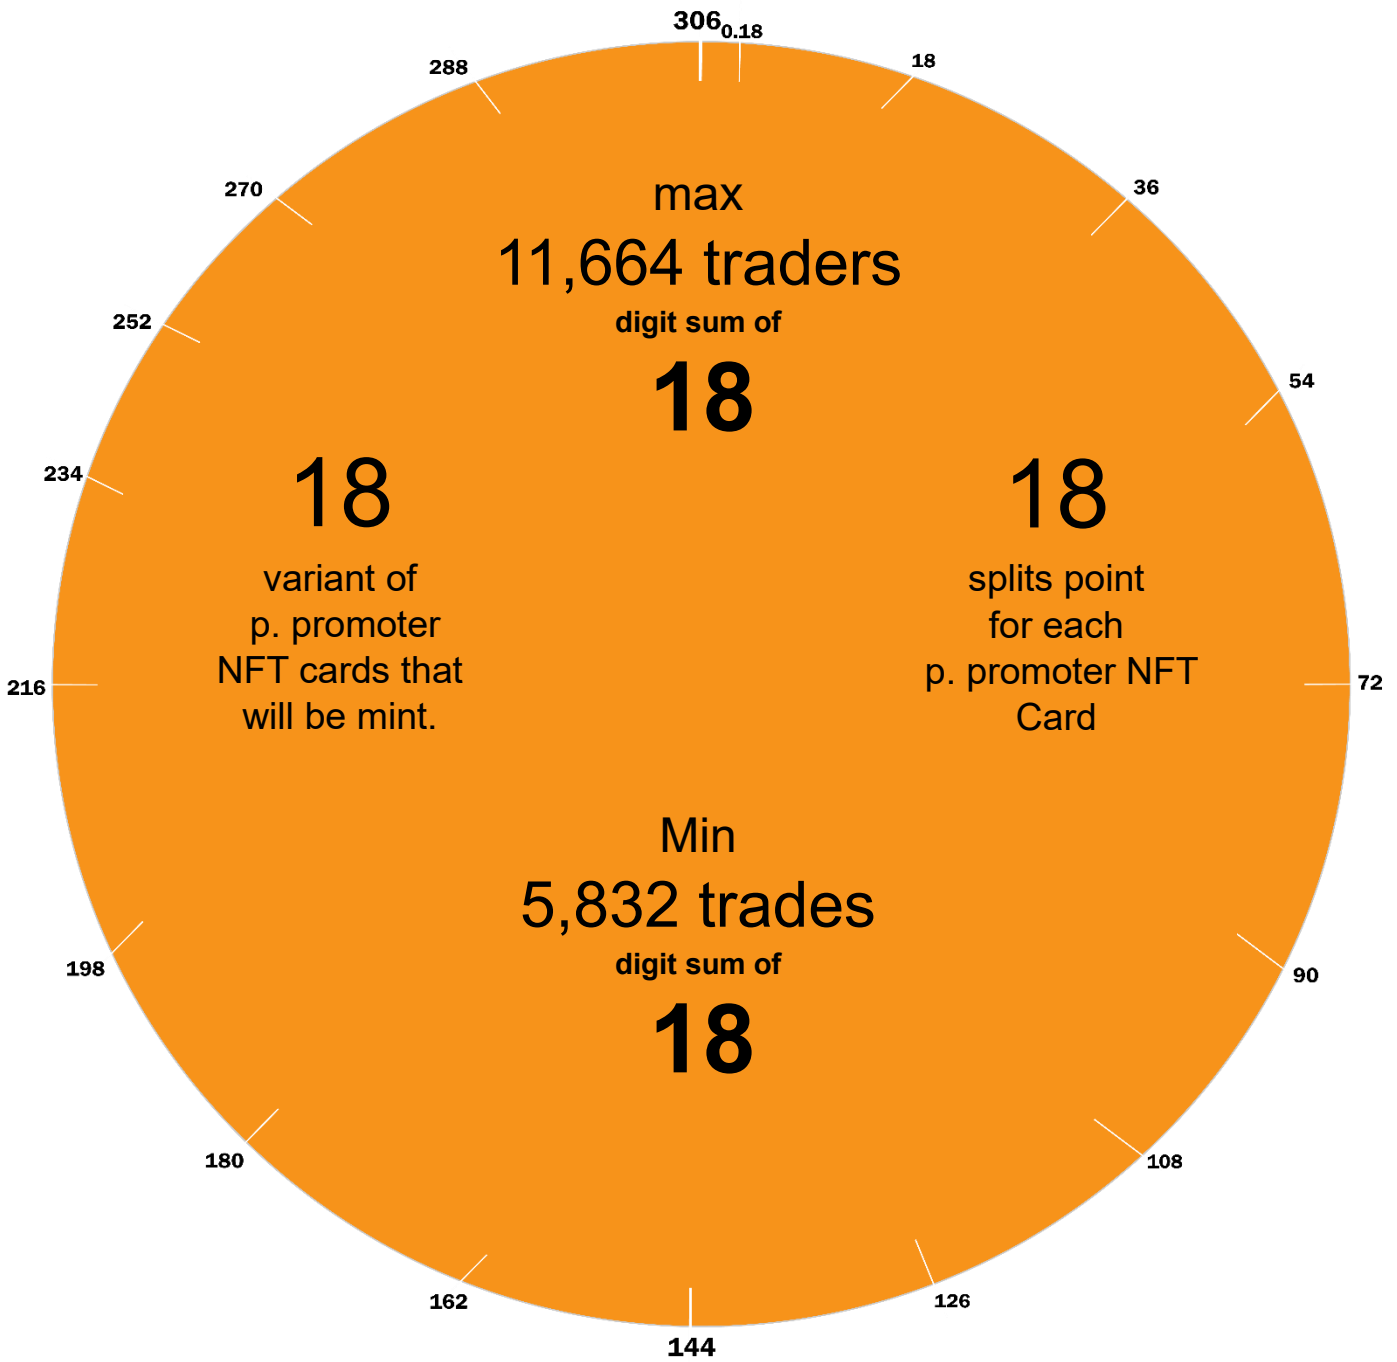

Before: p. promoter # 06 After p. promoter # 1.06, 2.06, 3.06...

I will be forced to carry out the relevant tests, and if I conclude that it is a traitor, I will issue an orderly publication on the various channels that I use. That's why I expect patriotic participants to stay tuned on the subject and always check the alerts.

the same thing can happen with a naive and innocent buyer that unfamiliar with the project and its goals. and the same risk management will be performed. it's kind of "Prison cell" for people with disloyal status.

18th wheel and the split points

Split point level by Matic/Pol price of card

7. first loyalties benefits details:

- Citizens:
Provided that the recruitment project is completed successfully
The main benefit is that, like 1.8% of the p. promoter, royalties will return to the community of citizens with an equal percentage of any income our team and I will be released from future projects.
An amount of 1.8% of any sum of royalties will always be distributed equally among the citizens. This will be done in a methodical and efficient way by a dedicated fund that we will establish. That's the basic concept."
- PTM:
A personal thank you letter from Deborah and Me and the giving of the exact last buy sum with the split point can be given with MATIC or USDC (minted NFT and the token/cryptocurrency that will be transferred directly to the PTM wallet)
a PTM can get this kind of benefit again every time he comes and establishes new split points. and no more than 18 split points from all over the project.
We are obliged to transfer the grant no later than 18 days after completing the split point.
- Hardworking Striker:
As I mentioned before, hard workers will get the same benefits of a PTM and a new untold thing that will be clarified in the next version of the white paper. The decision of who is worthy will be made by Deborah and Me.

8. roadmap inspired by Trash the Dress:

The end of Q2+Q3 2024

My independent marketing and the beginning of recruiting the first Patriots

Updates on the various channels, such as Twitter X, Reddit, and Discord, about benefits, the state of force, and the spirit of trade.

Production of my additional collections, including more benefits for participants with p. promoter

Another patch update to the white paper: layers of protection and additional details of the processes.

Q4 2024

God willing and there will be enough traffic

to establish the first foundations to make democratic decisions with the new rising community

the preparation for the Blockchain Wedding Party of Deborah and Benjamin, and everyone who participate with the P. Promoters is invited.

Q1 2025

Deborah and Benjamin's Blockchain Wedding party with our citizens, the new team that is emerging, and with our best hard workers. all of that taking place in the metaverse or any place that will be decided through equal voting.

9. declaration of intent:

- I do not provide personal investment advice, and I am not a qualified licensed investment advisor.
- I enjoy collaborative cryptographic income through the blockchain network and have sincere and serious intentions of giving back to the community in the hope that it will develop. I can't guarantee 100% success, but I know that I will put every % of effort into it!
- I am using my pseudonym to stay more anonymous and for the story to be told in the anonymous company of people. The anonymity of the community is more important than mine.
- I tried to make this quite clear in this white paper. I am in a bit of a hurry to meet the deadlines I have set for myself and publicly declared. I am also busy with my personal wedding arrangements, which is a traditional ceremony. The wedding mentioned in this white paper is meant to celebrate our success, and I plan to release updates soon.
I work alone and only alone with little headaches that I bring to my future wife.
This is the goal, to start from point zero.
- This white paper was first established on March 25, 2024, and completed on April 6, 2024, somewhere in Our Wonderful World.
- Sometimes, I communicate my intentions by leaving subtle clues and concealed information. This is most reflected in historical connections, spirituality, humor and curiosity.
- Things with my work, that may sometimes seem out of place, are actually where they need to be.

Sincerely,
Yours Benjamin @real18hiing
